SUMMARY

Software Developer with 5+ years of experience building scalable, high-performance web applications using React.js, Node.js, and NestJS. Experienced in frontend architecture, reusable component systems, performance optimization, and full-stack feature delivery across healthcare, real estate, e-commerce, and service-booking domains. Skilled in building SaaS platforms, REST APIs, Redis-based communication systems, and real-time applications using SSE. Strong focus on clean architecture, scalable codebases, and rapid production delivery. Experienced in leading frontend initiatives, mentoring developers, handling production incidents, and coordinating sprint execution.

SKILLS

Frontend: React.js, Next.js, Redux, JavaScript, TypeScript, HTML, CSS

Backend: Node.js, NestJS, Express.js, REST APIs

Database & Infra: MongoDB, Redis, Amazon S3

Tools: GitLab, Jest, Cursor, Jira, Figma

Other: SSE, Performance Optimization, Reusable Architecture, AI-Assisted Development

EXPERIENCE

AGILE INFOWAYS — Software Developer | Ahmedabad | Oct 2022 – Present

- Built scalable frontend systems for healthcare platforms serving 100k+ users using reusable React component architectures and critical workflow management.
- Delivered production applications across healthcare, real estate, and service-booking domains including configurable white-label platforms with modular theming and feature flags.
- Improved application reliability and performance through optimized state management, API efficiency, memoization, testing, and standardized UI systems, reducing bugs by 30% and improving targeted page performance by 40%.
- Developed backend services using NestJS, MongoDB, Redis, Amazon S3, and SSE-based real-time communication.
- Accelerated feature delivery by up to 50% using AI-assisted development tools including Cursor and Google Antigravity.
- Led frontend task planning, code reviews, sprint coordination, production support, and rapid incident resolution.

TATA CONSULTANCY SERVICES (TCS) — Assistant System Engineer | Bangalore | Nov 2020 – Oct 2022

- Developed customer-facing React-based e-commerce features, reusable UI components, and shared workflow modules.
- Automated repetitive operational workflows using Python-based standardization scripts reducing manual effort and configuration issues.
- Supported enterprise production releases through bug fixes, API integrations, sprint collaboration, and large-scale frontend delivery.

PROJECTS

DEALDESK — Real Estate | Senior Developer

React.js, NestJS, Python, MongoDB, Redis, SSE, Amazon S3

- Developed real-time communication architecture using Server-Sent Events (SSE).
- Implemented Redis pub/sub messaging between Python and NestJS services.
- Built notification systems, backend APIs, caching layers, and session management infrastructure.
- Reduced development and delivery time by 50% using AI-assisted development tooling.
- Led production support and handled high-priority incident resolution minimizing downtime.

PUREAI – DRCHRONO | Healthcare | Senior Developer

React.js, NestJS, MongoDB, Redis, Amazon S3

- Designed scalable backend systems for healthcare workflows including cron jobs, webhook integrations, Redis queues, report generation, and notifications.
- Improved development speed by 40% using AI-assisted tooling.
- Managed production incidents and rapid bug resolution for critical healthcare workflows.

IVIRA – CARE COMPASS | Healthcare | Senior Developer

React.js, Python, Redux, Amazon S3

- Architected and developed a healthcare SaaS platform supporting User, Admin, and Super Admin workflows serving 100k+ users.
- Developed Python automation scripts eliminating repetitive operational processes.
- Optimized frontend performance, application stability, and overall response time.
- Mentored junior developers and supported production-critical deployments.

AWARDS & EDUCATION

AWARDS

- Winner — Internal Company Hackathon
- Firefighter Award — Critical Production Incident Resolution

EDUCATION

Bachelor of Engineering — Information Technology
Sardar Vallabhbhai Patel Institute of Technology, Vasad, Gujarat
Aug 2020 | CGPA: 8.23
